Innovation

Diffusion

Cultural Hearth

Acculturation

Dialect

Religion

Sect. 2

Birthrate

Fertility Rate

Mortality Rate

Infant Mortality Rate

Rate of Natural Increase

Population Pyramid

Push-pull Factors

Population Density

Carrying Capacity

Questions:

Write the Questions! (Or lose 10 points)

1. Why is language so important to a culture? (p. 73)

It allows people within a culture to communicate with each other.

2. Name the five world major religions? (p. 75-76)

Christianity, Buddhism, Judaism, Hinduism, and Islam are the five world major religions.

3. What factors influence where people live? (p. 80)

Climate, altitude, and access to water influence where people live.

4. How is population density determined? (p. 81)

The population density is determined by dividing the number of inhabitants in an area by the total amount of land they occupy.
